Constant Team of Experts is our way for Resolving Projects Demands of all Type

Our company, in cooperation with our partners in Europe, is producing generating set units especially projected for each customer.

In our production we assemble the Generator and alternator. Base frame, sound isolated canopy and complete electrical cabinet with control panel are produced by our company. Because of this we are very flexible in the generating set dimensions, fuel tank volume, specific electrical cabinets and changeovers. We can offer manual control panel, automatic and parallel control panel with synchronization.

Because of our quality and flexible production, high technical knowledge, guarantee, service and maintenance we can supply customers with high technical demands such as:

- *Hidro electric plants on river Orava and Sava (Slovenia, Europe) up to 1,5MW*
- *Hospital Maribor (Slovenia, Europe), 1.6MW*
- *Antenna station Nanos,*

- *Pohorje (Slovenia, Erope), 2,2MW*
- *GSM network antenna and military object Slavonski Brod (Croatia, Europe), 1,0MW*
- *Arqeta food production*
- *Sarajevo (8IH, Europe),*
- *ERA shopping center Pristina (Kosovo, Europe),*
- *GPC Crane energetic Abu Dhabi (UAE) for IMCC*
- *GPC Control panel for Genset 500 kVA Abu Dhabi (UAE) for IMCC*
- *Generator sets and controls of 10 RTG's in WCS*
- *Full Electric supply of 12 RTG's for TGPC*

Our project engineers are with references all over the world, trained and skilled for all technical tasks.

Certificates

We have proven our competence as Siemens Solution Partner in the following areas:

- Power Generation
- Automation
- Power station
- Power Distribution

We are specialized in design and development of the :

Consulting in IT Field

We consult how to improve business process, reduce costs and achieve maximum return on investment. We help the customer to set requirements and goals, develop project documentation and use cases and calculate development and overall investment costs.

Development of the new solutions

We collaborate with the customers to develop and implement solutions that solve their technology and business challenges, as well as mission-critical systems. We develop applications, whole systems and tools for dealing with the wide range of today's information technology issues and business requirements.

Customization and enhancement

According to customer needs we customize existing or develop new functionality for the installed systems.

Power plant process and signals visualization and tracing

Based on our experience we design and develop process and signal visualization systems, as well as signal archiving and compressing software solutions.

Lerning system creation

We develop learning multimedia systems based on macromedia quality, that prove seamless and fast learning curve, as well as applications enriched with multimedia experience and the internet oriented applications.

Implementation of industry standard and vendor specific communication protocols

We are experienced in creating communication drivers and application based on vendor (Siemens, Babcock, ABB) and standard (OPC) Protocols.

Information about the Siemens Solution Partner Program

Under the Siemens Solution Partner Automation and Power Distribution Program, we join forces with our Solution Partner. By merging our product and systems expertise with the application and industry knowledge of our partners, we have created a common basis for the fast, smooth and highly efficient implementation of your requirement –customized solutions for your competitive advantage.
